References: Available on request

An outstanding software engineer who majors in React and Node. My core value is empathy reason being that I transitioned to tech. I take interest in learning and re-learning to provide simple and accessible solutions.
I am passionate about building and teaching neat, small, and decomposable web.

Work Experience

Lead web-developer
2020-Present | sharpview optometric clinic
- Built a frontend side app with react
- Solely responsible for the frontend initiatives
- Created and consumed a backend rest service built with nodeJS

Instructor
2019-2020| Coding for teens
- Lead and mentor teens eager to learning web technologies
- Facilitated coding experience on the MERN stacks

Junior Developer
2018-2019| Adebisi Foods
- .Worked together with a team to implement a functional web app
- Explored PHP to create backend models

SITES
A REACT GAME| https://playxjungle.com
Simulated a popular paper game in react.

BBNAIJAOCTOPUS | fun webapp
 https://www.bbnaijaoctopus.com
- Built a reusable dark-mode react theme
- Consumed JSON instead of databases
- Explored Gatsby-image

PROJECT
MERN | https://github.com/kelvinsekx/standaloneBack
Created a fully functional backend with express integrated with react and developed AUTH functionalities with JWT integration.

LETTERLOADING JS | A javascript simulation library
October, 2020 | kelvinsekx.github.io/letterloading/
- Planned out and implemented a javascript library from scratch
- Wrote OOP javascript in order to build the library
- Published on npm

ReactiDom|
January, 2021 - presently|
- A dummy project to simulate React API with the dom.

PUBLICATION AND WRITING
I have written articles on topics ranging from **html, CSS, javascript, react and node**. You can find them at https://www.kelvinsekx/articles.
